Summary

Enthusiastic and motivated third-year **Computer Science** student with a strong foundation in **full-stack web development** and **mobile app development** using Flutter. Proficient in programming languages including **Java, C, Python**, and **JavaScript**, with hands-on experience in building scalable applications and managing databases.

An active member of the **Micro Club**, contributing to collaborative projects and honing problem-solving skills. Skilled in both **UI/UX** design and back-end development, with a proven ability to create intuitive user interfaces and develop robust back-end services and APIs. Eager to apply technical expertise and innovative thinking to contribute effectively as a Software Engineer in a dynamic and challenging work environment.

Education

USTHB

Computer Engineering

Field : Cybersecurity

September 2022 - Present

Projects

Hotel Management System (Java)

I developed a hotel management system that processes 200+ bookings per month, applying Java OOP principles, MVC architecture, and designing an intuitive GUI.

Travel planning website

Developed a dynamic travel planning website that allows users to create personalized travel itineraries by inputting details . Designed an intuitive user interface to enhance user experience and implemented robust backend functionality to store and manage user-generated travel plans efficiently.

Recipe App (Flutter)

Developed a mobile recipe app using Flutter and SQLite, enabling users to browse and save over 50 recipes, implementing state management for smooth navigation.
